EDUCATION

The London School of Economics **September 2025 – June 2028**

BSc Mathematics with Data Science

- Year 2 modules: Real Analysis, Optimisation Theory, Algorithms and Data Structures, Probability and Distribution Theory, Further Mathematical Methods (Calculus and Linear Algebra), Statistical Inference, Differential Equations.

King Edward VI Handsworth Grammar School for Boys **September 2020 – July 2025**

- A-Levels: Maths (A*) in Year 10, aged 15; Physics (A*) and Further Maths (A) in Year 11, aged 16, alongside GCSEs.
- Captain of the school swimming team for two years; Headmaster's Top Scholar 2025.

EXPERIENCE

Work Experience (Rotational), Kepler Partners **October – December 2026**

- Secured through cold outreach; invited in after a technical discussion with the co-founding Managing Partner, a Partner and the Head of Investment Companies Research on detecting buyback effects in trust discount data.
- Rotating weekly across the research, marketing and investor relations teams at a firm working with over 100 asset managers and investment companies, with hands-on data analysis to follow.

Futures Taskforce Member, Q5 Partners **September 2026 – Present**

- Selected by interview for Q5's Futures Taskforce, a paid research panel of students from different universities and disciplines investigating a future trend and its implications for organisations and the future of work.
- Researching how AI is reshaping early careers for a client, across four full-day workshops, co-authoring the research.

Campus Ambassador, Everesteer **August 2026 – Present**

- Represent Everesteer, a quantitative prediction platform, at LSE, building relationships with student societies and running campus events to drive platform adoption.
- Paid on measurable outcomes: sign-ups, sustained users and events delivered across LSE's quantitative communities.

Founder, EduLearn **June 2022 – September 2025**

- Founded and scaled a tutoring agency in maths, physics and computer science from around £70 to £1,500 peak monthly revenue, reaching roughly 50 students at GCSE and A-Level.
- Recruited and managed a team of 10 to 15 tutors, setting pricing by experience and demand and allocating tutors across students under competing constraints of subject, level, availability and cost.
- Managed every client relationship directly: parent consultations, progress expectations and complaints.
- Maintained delivery quality across a distributed team by gathering feedback from students and parents independently of tutors, then coaching or rematching where needed.

COMPETITIONS

QuantHack Trading Competition, June 2026. Finished in the top 20 of 300, managing a $1m simulated portfolio on a trading platform sponsored by Anthropic, AI Engine and Nvidia, ranked on total return, maximum drawdown and Sharpe ratio.

Rockstar Games Datathon, September 2025. Placed second for analysis and presentation, working with large-scale in-game economic datasets to identify the main drivers of player engagement and retention, and presenting the findings.

PROJECTS

Moving-Average Crossover Backtest (Python). Tested a trading strategy on SPY with realistic costs and a one-day signal lag, finding it underperformed buy-and-hold once costs were included. Code: github.com/Pickle1200/ma-crossover-backtest

Market Risk-Return Dashboard (Python, pandas, matplotlib). Analysed a four-asset portfolio (equities, tech, long bonds and gold) over 2018–2026, computing returns, volatility, Sharpe ratios, correlations and drawdown. Found long bonds and gold moving together, explored real rates as a possible common driver, and set out the analysis's limitations. Code: github.com/Pickle1200/Market-risk-dashboard

Roblox Game Development. Designed and shipped three live multiplayer games solo, building and balancing an in-game economy with pricing, progression and paid purchases.

LEADERSHIP & ACTIVITIES

LSE Accounting Society: Appointed Head of Outreach.

SEO London: Finance & Corporate stream; Real Estate Academy, selected for the in-person days on the strength of engagement and for its follow-on mentorship programme, with hands-on Excel training on property financials.

Insight events: S&P Global Client Forward (selected via aptitude assessment); J.P. Morgan.

SKILLS

Technical: Excel (financial spreadsheets, modelling conventions), Python (pandas, NumPy, matplotlib).

Analytical: financial and data analysis, statistics, probability, regression, mathematical modelling.
